WELCOME

Hello, and welcome to the first issue of our monthly newsletter for Rail Simulator. Throughout the course of the development we will be here every month bringing you news, features and sneaky peeks behind the scenes!

Currently in the early stages of development, Rail Simulator has already attracted a lot of interest from the train simulation community. In the UK we're working with Matt Peddlesden (uktrainsim.com) and Vern Moorhouse (trainsim.org.uk) and we have had contact from several other sites in Europe. Over the coming months we hope to build and strengthen ties with these and many other simulation sites around the world.

See the item below for details of how your site could be profiled on www.railsimulator.com and for advance information on forthcoming features on the official website!

Until next month!

IMAGE

A new Rail Simulator image was posted to the UKTrainSim forums to congratulate them on reaching 1000 posts after only six weeks! So far this image has only been made available through their forums, but it will be made available on the official website from next week. You can pick up a copy for your site now by following the image link below.

COMMUNITY PROMOTION

As part of our efforts to work with the community, we are going to be running a series of profiles of community sites around the world. For the chance to have your site profiled on railsimulator.com email your answers to the questions below to subscribe@railsimulator.com

- When was your site set up?
- What inspired you to start it?
- Why should train simulation fans visit your site?
- What 3 things do you most wish to see in Rail Simulator?

COMING SOON

In the next month we will be announcing one of our UK routes! There's going to be information about what the route will contain, as well as a feature on our research trip along the route!

Also coming up in September, we're going to be releasing the first images of a Rail Simulator train!
